

AT LAST - A GUIDE TO A SCIENTIFICALLY BALANCED NATURAL DIET for DOGS and CATS

The feeding of natural diets to companion dogs and cats is becoming increasingly popular. However many pet owners may not have sufficient knowledge to provide a fully balanced diet for their pet.

This book will be of benefit to dog and cat owners, breeders, veterinarians and all animal health professionals, interested in learning how to feed dogs and cats a balanced home prepared diet.

Dr Clare Middle is a veterinarian with over twenty five years experience treating dogs and cats with both conventional and complementary veterinary medicine.

She has combined a wealth of experience with sound science to produce this inexpensive book which is easy to read and use.
